

WEB APPLICATION — UI/UX PROPOSAL

PhysioConnect

On-Demand Physiotherapy Booking — Web Application

A modern, professional platform connecting patients with verified physiotherapists — instant home visits, scheduled bookings, and live video consultations, all from one clean web app.

Designed & Developed by Techmall Consultancy Services | Pune

"PhysioConnect" is a working title — final brand name can be finalised with the client.

Trusted Physiotherapy, On Your Schedule

Patients struggle to find reliable, qualified physiotherapists quickly — especially for home care. PhysioConnect solves this with a fast, transparent, and professional booking experience.

Instant or Scheduled

Patients choose an on-demand visit within minutes, or book a therapist for a later date and time.

Verified Professionals

Every physiotherapist is background-checked, rated, and reviewed — building real trust.

Full Transparency

Live tracking, therapist details, secure OTP check-in, and clear payment status at every step.

Video Consultations

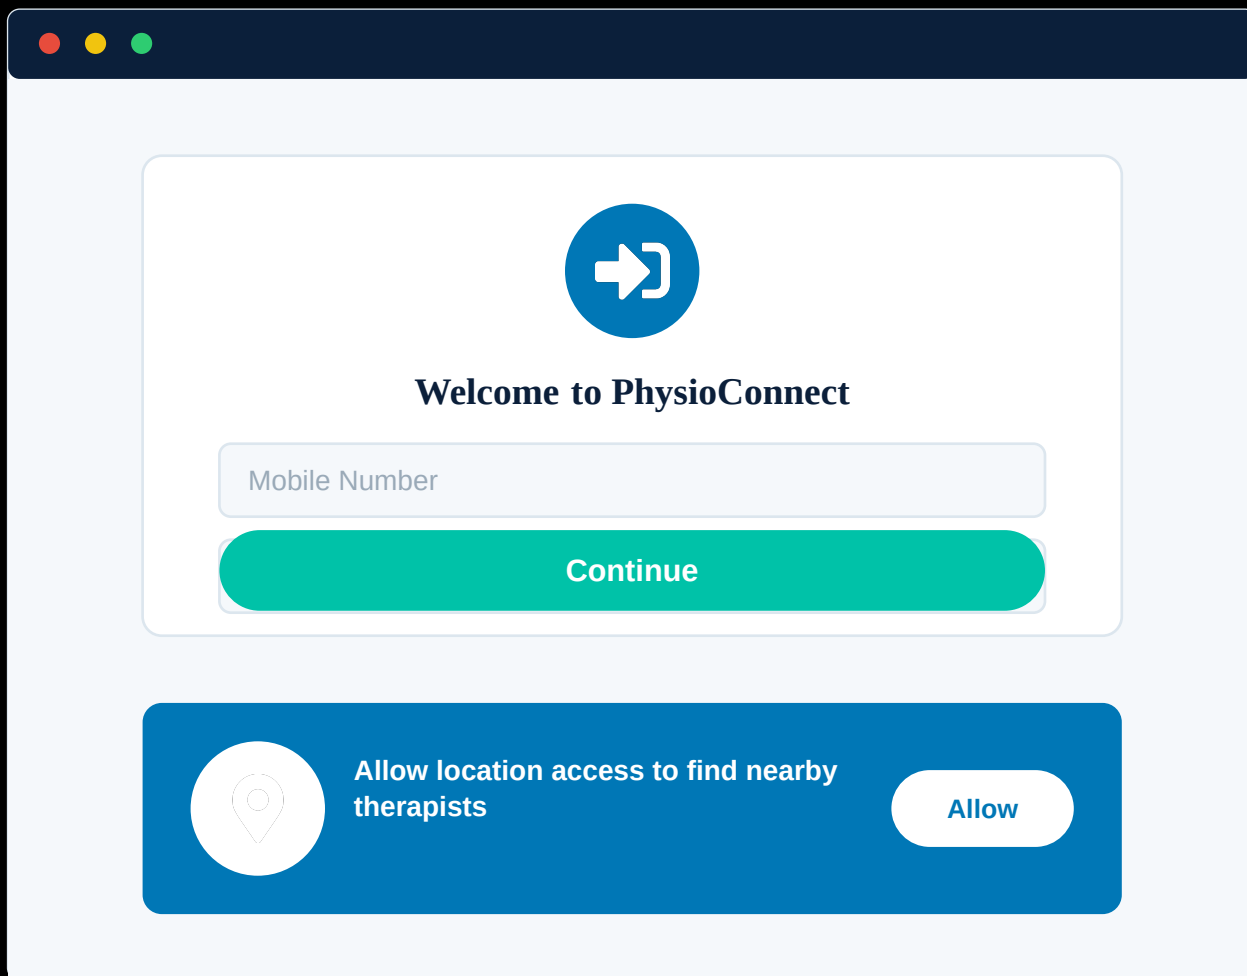

Follow-ups and initial assessments can happen remotely — no visit required.

Complete Patient Journey — End to End

Every step above becomes a clean, guided screen in the web app — reducing confusion and drop-offs.

Sign Up, Login & Location Access

Welcome to PhysioConnect

First Impressions Matter

- ✓ Quick mobile-number based login with OTP — no long forms.
- ✓ Location permission is requested clearly, with a reason given.
- ✓ Clean, minimal design builds trust from the very first screen.
- ✓ Secure, encrypted sign-in for both patients and therapists.

Select Health Problem & Booking Type

Patients pick their concern in one tap, then choose how quickly they need help.

Knee Pain

Stroke Recovery

Back Pain

Neck & Shoulder

Post-Surgery

Sports Injury

Choose Booking Type

Instant Booking

A verified therapist reaches you as soon as possible — ideal for urgent pain relief.

Scheduled Booking

Pick a convenient date and time slot for a planned visit or follow-up.

Speed Meets Trust

-  System auto-matches the closest verified therapists to the patient.
-  Ratings, experience, and distance shown clearly for easy choice.
-  One tap sends a booking request — no phone calls needed.
-  Therapist accepts in-app; patient is notified instantly.

5

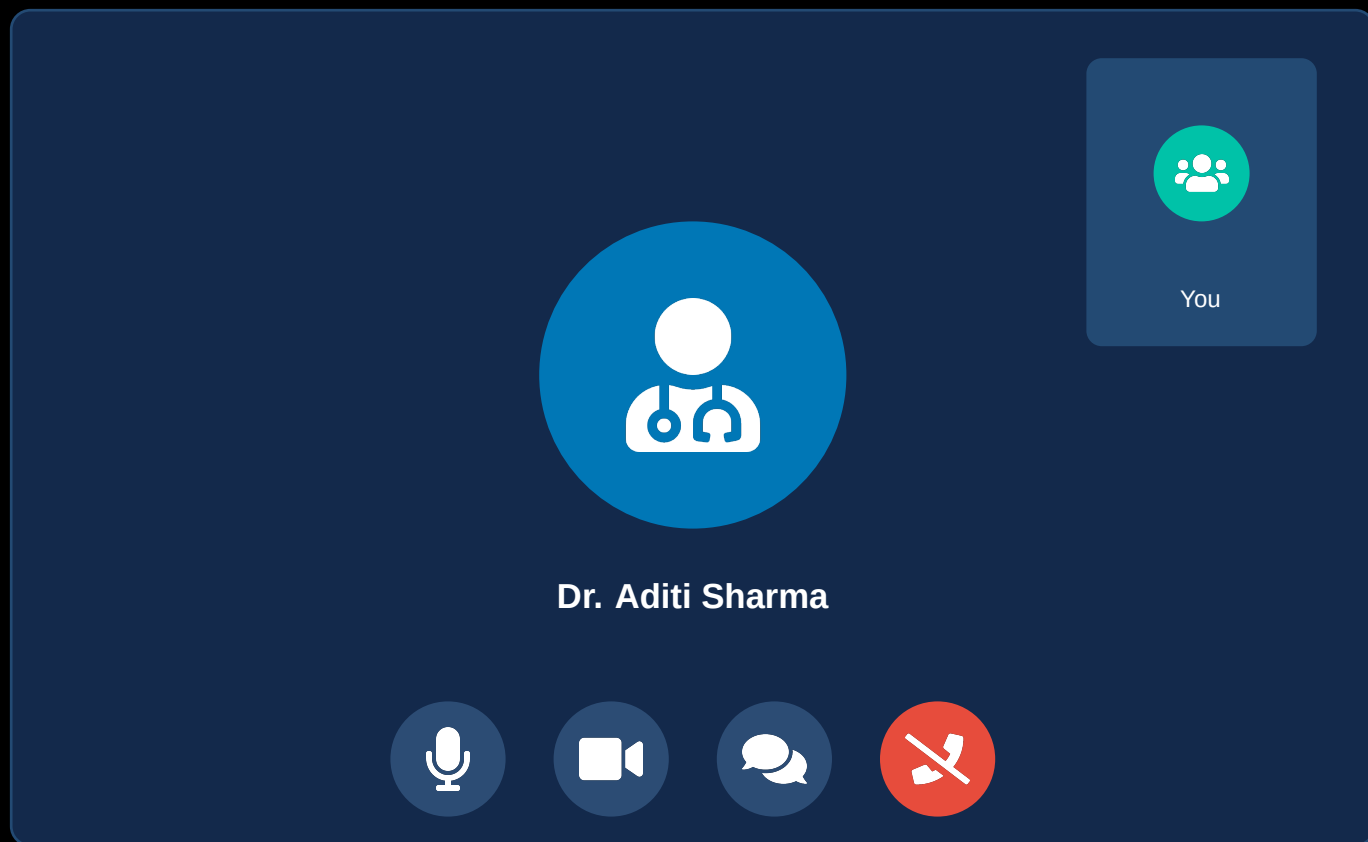

Verify & Start Session

Safety First

-  OTP confirms the right therapist has arrived at the right patient.
-  Session timer starts automatically once verified.
-  Adds accountability and safety for both patient and therapist.
-  A digital record of visit time is saved for both parties.

Built-In Video Consultation

For follow-ups, quick assessments, or patients who can't get a home visit — therapists can consult live, right inside the web app.

HD Video & Audio

Clear, real-time consultation directly from browser — no extra app needed.

In-Call Chat

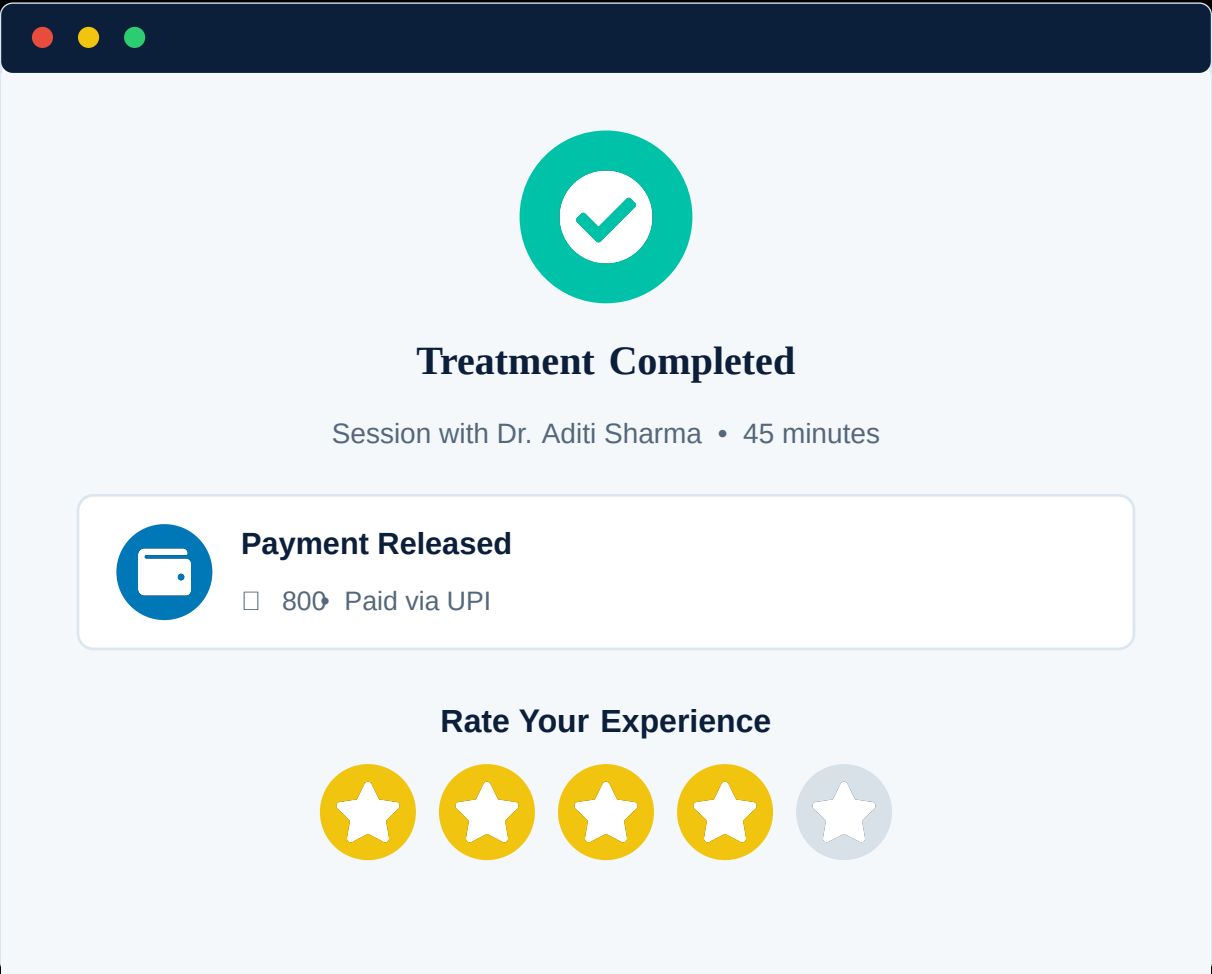

Share notes, exercise instructions, or images during the session.

Easy Scheduling

Patients book a video slot the same way they book a home visit.

Session Complete: Payment & Rating

Closing the Loop

-  Payment is auto-released once treatment is marked complete.
-  Multiple payment options: UPI, card, wallet, or net banking.
-  A simple star rating keeps therapist quality consistently high.
-  Digital receipt and session summary saved to patient history.

WHY THIS APPROACH WORKS

Modern, Responsive & Professional

Fully Responsive

One clean codebase that adapts perfectly to desktop, tablet, and mobile browsers.

Real-Time Tracking

Live location updates keep patients informed and reduce anxious waiting.

Secure by Design

OTP verification, encrypted payments, and verified professionals throughout.

Telehealth Ready

Built-in video consultation extends care beyond just home visits.

Consistent Experience Across Every Screen

Tablet

Mobile

NEXT STEPS

Let's Build PhysioConnect

A modern, trustworthy platform — designed to make physiotherapy accessible, transparent, and just a few clicks away.

1

Requirement Finalisation

Confirm features, branding, and design preferences together.

2

UI/UX Design

Full screen-by-screen design for web and mobile browsers.

3

Development & Launch

Build, test, and launch the platform on an agreed timeline.
